Job experience

March 2018 – Present
Front-end architect
FUTURE WORKSHOPS

I'm currently leading the web development projects of the company. Ranging from progressive web applications to dashboards and SPAs. Working mainly with React, Ruby on Rails and AWS.

September 2017 – March 2018
Front-end architect
uic barcelona

I prepared, tested and established the front end technologies that the development team is using to build the new university applications.
I led the front side of the project while building said applications with React/Redux.

April 2017 – September 2017
Front-end developer
PUTPUT

I developed new features and front end solutions for multiple websites and applications and
built them with a responsive design in mind and following the best practices.

April 2016 – April 2017
Community manager
TMB Transports Metropolitans de Barcelona

- Manage and create web content
- Attend Twitter requests and content

Education

2016 – Present
